IBM4212 Marketing Problems Syllabus — Fall 2026

Instructor: Dr. Yufan (Frank) Lin

Course Information:

- **Course**: IBM 4212 Marketing Problems
- **Class Schedule**: Monday & Wednesday, 4:00 – 5:15 PM — **Bldg 9, Rm 211**, except **Zoom case workdays: Sep 16, Sep 30, Oct 14, Oct 28** (class Zoom link on Canvas)
- **Term**: August 20 – December 6, 2026. **Final Exam: Monday, November 30 — in person, in class (Bldg 9, Rm 211).** The **Teaching Note Report** (team capstone) is due at the registrar-scheduled final-exam slot during finals week (December 7–13, announced on Canvas)
- **First class meeting**: Monday, August 24 (in person)

Office Hours: Monday & Wednesday, 11:00 AM – 1:00 PM — **by appointment (required)**: email me to reserve a slot so you aren't double-booked with another student. Zoom appointments available.

Email: yufanlin@cpp.edu (preferred contact method)

- *Please don't hesitate to reach out if you have questions or concerns—I'm here to help. I aim to respond within 24 hours Monday through Friday, and will check messages at my convenience on weekends. I regularly monitor email between 10 AM and 5 PM on weekdays.*

Course Learning Objectives

Are you curious about why the iPhone soared in popularity while its predecessor, the Apple Newton (the inaugural PDA/personal digital assistant), didn't make the mark? Ever wondered why Apple unveiled the Apple Glasses when the highly publicized Google Glass, the first augmented reality headset, couldn't live up to its hype? Interested in understanding how Amazon managed to carve a niche in the lucrative tablet market, a domain Apple established with the iPad, using clever segmentation, targeting, and positioning? Our Marketing Strategy course aims to unravel these mysteries. We'll embark on a journey through time, revisiting real marketing events and famous products or services, creating a parallel universe to explore these intriguing what-if scenarios!

This is fundamentally a course about developing marketing strategies, which is a complex and rewarding process that must take into consideration the ways in which value is created, distributed, and contested in markets. All organizations develop marketing strategies and learning how to think about and create strategies of your own will greatly increase your chances of future career and personal success.

This course focuses on strategically analyzing and solving marketing problems from a decision makers' perspective. Specifically, the course has three key learning objectives:

1. Understanding and effectively using the "first principles" of marketing strategy to solve business problems (fundamental frameworks, processes, and analysis tools of marketing strategy organized under four marketing principles).
2. Co-piloting with Generative AI to solve business problems.
3. Learning by teaching: your team teaches its case to the class — going beyond my recorded discussion — and writes an original teaching note for it, with AI as your preparation partner.

Some critical success factors for business leaders include framing the business issue or problem (frameworks), outlining the steps for solving problems (processes), collecting data and applying analysis tools to inform problems (data collection and analyses), and weighting and integrating information to make choices (decisions). Thus, the overall objective of the readings, lectures, in-class exercises, assignments, and cases will focus on these critical success factors.

Upon successfully completing this course, the student should be able to employ strategic analysis tools, develop and redefine problem-solving and decision-making skills, and demonstrate these skills orally and in writing.

Why AI is Central to This Course

Marketing is the business function being most rapidly reshaped by generative AI. Brand managers, market researchers, and product strategists already co-pilot with tools like ChatGPT every day, and the gap between graduates who can do this well and those who cannot is widening fast. A marketing strategy course that ignores AI in 2026 prepares you for yesterday's job, not tomorrow's.

But — and this is the part students often miss — **AI does not replace strategic judgment; it raises the price of not having it.** Anyone can ask ChatGPT for "a marketing plan." Few can tell whether the plan is any good, why it would or would not work in this market, or which of the first principles it violates. The case method is the perfect proving ground for this dual skill: cases reward judgment under ambiguity, which is exactly what AI lacks. Pairing every case with structured AI use forces you to practice both — frame the problem rigorously *first*, then direct, critique, and integrate what the AI produces.

This semester, AI runs through the course in three ways:

1. **AI-tutored case preparation.** You prepare every case by *talking* with an AI tutor (ChatGPT voice mode, using the starter prompt in each assignment doc) — it quizzes you, challenges your position, and refuses to hand you answers. Your first take comes before AI; the delta between your draft and your final answer is part of what's graded. We practice the entire workflow together, in class, in Week 2 — on the first real assignment, before it's due (bring headphones; you finish your own session at home in a quiet spot).
2. **AI-assisted teaching.** Your team will walk the class through its own case assignment — the best answer to each question and how AI helped you reach it — then extend it with an **AI synthetic-respondent perceptual map** (I demo the method on Amazon in Week 12; you apply it to your case), and write an original **teaching note** built around that extension. Teaching is the strongest test of understanding — and preparing to teach with AI is the co-intelligence skill at its most demanding.
3. **Dedicated AI method lectures** — the voice-mode workshop (Week 2), the AI-powered perceptual-map extension session (Week 12), and the AI in Business foundation lecture (Week 13, **recorded** since the Oct 26 schedule change), which lands *after* you've co-piloted through five cases and can connect the frameworks to your own experience.

Class Format

Live lectures, in person — effective September 14 following student feedback. Lectures, debriefs, quizzes, and team presentations meet in Bldg 9, Rm 211. **Case workdays meet on Zoom starting September 16: Sep 16, Sep 30, Oct 14, and Oct 28, 4:00–5:15 PM.** Join through the class Zoom link on Canvas; no campus meeting on those dates. Monday is reserved for live concept teaching or a live case debrief, with time for questions and applications. Lecture recordings support review; watching a recording does not replace attending the live lecture.

Each case runs a **two-week cycle**:

1. **Monday, lecture week:** learn the concept live, apply it, and preview the case. Under Armour focuses on **branding**; Google Glass focuses on **offering diffusion**.
2. **Wednesday, lecture week — case workday on Zoom:** work on the assignment with the voice-mode AI tutor (bring headphones), draft your first takes, and build your numbers. **No quiz on a case workday.**

3. **Sunday 11:59 PM:** submit the case on Canvas. Monday's live debrief discusses the case; come ready to defend your answers.
4. **Monday, case week — live debrief:** compare your positions, work the numbers, and discuss the case. No Monday quiz.
5. **Wednesday, case week — quiz + team teaching:** take the scheduled quiz(s), then the case team teaches and the class evaluates its presentation.

Quiz lag: Wednesday quizzes test the **previous week's material**, not that same Monday's lecture. If Wednesday is a case workday or holiday, that quiz moves to the following Wednesday alongside the next quiz. The quiz calendar below names each quiz's exact content and teaching date. Double days reserve about 20 minutes so each quiz gets its own 10-minute window.

Rhythm: Monday live lecture/debrief · Wednesday quiz + team teaching, or a protected Zoom case workday · cases due Sunday night.

Prerequisites: IBM 3302 (Marketing Research) & IBM 4112 (Consumer Behavior).

Text book

Textbook (Required): Marketing Strategy: Based on First Principles and Data Analytics 2nd Edition, *by Robert W. Palmatier, Shrihari Sridhar*. The live lectures use its Marketing Principles and selected case concepts, and the Wednesday quizzes draw on the previous week's taught material, and each case cycle names the chapter to study first (for example Chapter 10, sustainable competitive advantage, before Aldi). You will attach chapter text to your optional study-partner AI session, so you need your own e-textbook access.

Harvard Business Cases (Required) readings in the form of articles/cases from Harvard Business School Press. Students must purchase the cases immediately if you don't subscribe to Instant Access Complete. Both the textbook and the cases are available on Canvas → Sidebar → Instant Access Complete.

Tools

- ChatGPT (voice mode is the recommended case-tutoring workflow — see each assignment doc). ChatGPT Edu: free access through your CPP email. Office 365 Co-pilot: free access through your CPP email.

Grading

Task	Points
Business Case Discussions (5 × 10)	50
Weekly Quizzes (best 10 of 13 × 5)	50
Team Presentations (class-survey graded: case presentation 12 + extension presentation 8)	20
Teaching Note Report (team capstone)	20
Final Exam	50
Attendance & Participation (Zoom-chat check-in)	10
Total	**200**

Team Teaching Project (NEW)

In Week 1 you will form **four teams**, and each team is assigned one case (Aldi, Under Armour, Google Glass, or Chunlei). You live through your case's cycle as a student — then you switch sides of the desk, twice. Three deliverables:

Deliverable	What it looks like
1 — Case Walkthrough: the Wednesday of your case week, in class (15 min + 10 min Q&A; 12 pts)	Your team presents its own case assignment. For each question: where each member started (Box A), one tutor push shown on screen and what it changed, and the answer the team now thinks is best, with the framework and page-cited evidence. Close with three best practices for AI-assisted case work. The goal is to help the whole class do better on the case assignments still to come. (Changed Oct 12 after mid-semester feedback; Teams 1 and 2 presented in the earlier "beat the debrief" format.) Dates: Team 1 (Aldi) Sep 23 · Team 2 (Under Armour) Oct 7 · Team 3 (Google Glass) Oct 21 · Team 4 (Chunlei) **Mon Nov 16** (moved with the Chunlei extension; see Cycle 5 below). The class evaluates each presentation by survey at the end of that session.
2 — Extension Presentation: Mon Nov 23, in person (12 min + 3 min Q&A; 8 pts)	In the Nov 9 extension session I demo the method live: **perceptual maps built from AI synthetic respondents**, applied to Amazon's tablet positioning. Your team then applies the same method to *your* case — build the map, interrogate your case's positioning with it, and propose the strategy it reveals. All four teams present on Nov 23; class survey at the end. This presentation is the live pitch of your report's extension section.
3 — Teaching Note Report: due at the finals slot (20 pts)	An original instructor's manual for your case, **built around your perceptual-map extension**: learning objectives, fully worked question analyses (numbers computed, wrong answers diagnosed from the real class debrief), a 50-minute discussion plan, the full AI-synthetic-respondent perceptual-map extension as a runnable classroom activity, and an AI co-authorship appendix. The Dec 2 instruction session walks the structure with a worked example. Full assignment document on Canvas (Module: Team Teaching Project).

How the presentations are graded (12 + 8 = 20 pts). The class rates each presentation on a Google Form on five dimensions; your score on each round is the survey average scaled to that round's points, moderated by me (up to ±10% for observed contribution imbalance, informed by a brief within-team peer-check). Own-team ballots are excluded. Using AI to *prepare* is required and expected; presenting AI-generated slides you can't defend in Q&A — or reading Box B aloud without showing how you got there — is the fastest way to a low survey score.

One integrity rule that matters: the publisher's real teaching notes are instructor-only. Hunting one down — or prompting an AI to reconstruct one — is an academic-integrity violation. Your note is graded on *your* reasoning about *your* classroom, which no leaked document contains.

Why teach? Because it is the strongest form of learning — and because "I wrote the instructor's manual for a Harvard case, with AI as my co-author" is an interview story that outcompetes any line about coursework.

Schedule

Five case cycles, each pairing live teaching with a case: **Amazon Kindle Fire** ← P1 All Customers Differ · **Aldi** ← P3 All Competitors React · **Under Armour** ← **Managing Branding** · **Google Glass** ← **Offering Diffusion** · **Chunlei** ← P4 All Resources Are Limited (taught Nov 2). Case submissions are due **Sunday 11:59 PM**; every lecture and case debrief is live (no discussion recordings); model answers are released after grading.

Cycle 5 exception (changed Oct 26): Chunlei is due **Sun Nov 8** (one week later than planned) and comes with an **ERP/RFO primer** in the assignment. The P4 lecture moves to Nov 2; the Chunlei debrief and Team 4's walkthrough move to Mon Nov 16; the AI in Business Foundation lecture becomes a recording.

Wk	Monday	Wednesday
1	**Aug 24 —** Course intro *(live)*: why this course runs on experiential learning and AI co-piloting · how the flipped format works · contact sheet · team formation + case assignments. *Syllabus practice quiz opens on Canvas this week.*	**Aug 26 —** *Live lecture:* **Marketing Strategy overview — first principles framework** (Chapter 1). *P1 recording + Amazon assignment + Skill Guide posted this week.*
2	**Aug 31 — Quizzes 1 + 2** (Marketing Strategy Overview and All Customers Differ) · Discussion: All Customers Differ — favorite-retailer heterogeneity exercise, positioning-statement critique (JC Penney) · Amazon case preview	Sep 2 — Voice-mode workshop: set up your AI tutor and walk the full submission workflow together on the actual Amazon Kindle Fire assignment — this is your guided workday (bring headphones; finish on your own at home in a quiet spot). Due Sun Sep 6, 11:59 PM; discussion recording unlocks Mon Sep 7
3	***Sep 7 — Labor Day, no class*** *(use the extra day to watch the Amazon discussion recording)*	**Sep 9 — Amazon Kindle Fire debrief** (Quiz 3 on Sep 23; Sep 16 is a protected Zoom case workday)
4	**Sep 14 — Live lecture: All Competitors React (P3)** — sustainable competitive advantage; three-purchases exercise · Aldi preview · Team Teaching Project Q&A. **No quiz.**	**Sep 16 — Case workday: Aldi — on Zoom, 4:00–5:15 PM. No quiz.** Join via Canvas; type “check in” in Zoom chat when prompted. Quiz 3 carries to Sep 23. ***Due Sun Sep 20***
5	**Sep 21 — Aldi live debrief** · compare answers and work the numbers	**Sep 23 — Quizzes 3 + 4:** Amazon debrief (Sep 9; deferred) + P3 live lecture (Sep 14). Then **TEAM 1 PRESENTS: Aldi** (15 min + 10 min Q&A) + survey. Aldi debrief is quizzed Oct 7.
6	**Sep 28 — Live lecture: Managing Branding** · brand meaning, positioning, and growth · **Under Armour** preview. Branding is this cycle’s lecture focus.	**Sep 30 — Case workday: Under Armour — on Zoom, 4:00–5:15 PM. No quiz.** Join via Canvas; type “check in” in Zoom chat when prompted. Quiz 5 carries to Oct 7. ***Due Sun Oct 4***
7	**Oct 5 — Under Armour live debrief** · apply the branding lecture	**Oct 7 — Quizzes 5 + 6:** Aldi debrief (Sep 21; deferred) + Branding lecture (Sep 28). Then **TEAM 2 PRESENTS: Under Armour** + survey. Under Armour debrief is quizzed Oct 21.
8	**Oct 12 — Live lecture: Offering Diffusion** · adoption, barriers, and market acceptance · **Google Glass** preview + mid-term course evaluation	**Oct 14 — Case workday: Google Glass — on Zoom, 4:00–5:15 PM. No quiz.** Join via Canvas; type “check in” in Zoom chat when prompted. Quiz 7 carries to Oct 21. ***Due Sun Oct 18***
9	**Oct 19 — Google Glass live debrief** · apply offering diffusion	**Oct 21 — Quizzes 7 + 8:** Under Armour debrief (Oct 5; deferred) + Offering Diffusion lecture (Oct 12). Then **TEAM 3 PRESENTS: Google Glass** (case walkthrough) + survey. Google Glass debrief is quizzed Nov 4.
10	**Oct 26 — Live lecture: Innovation, market research, and offering development** (Chapter 6) · business-model innovation	**Oct 28 — Case workday: Chunlei — on Zoom, 4:00–5:15 PM. No quiz.** Join via Canvas; type “check in” in Zoom chat when prompted. Quiz 9 carries to Nov 4. *Chunlei now due Sun Nov 8.*
11	**Nov 2 — Live lecture: All Resources Are Limited (P4)** · the ERP/RFO frameworks walked through + Chunlei preview	**Nov 4 — Quizzes 9 + 10:** Google Glass debrief (Oct 19; deferred) + innovation & offering development lecture (Oct 26). **Then Chunlei workday in the room** (bring headphones; finish at home). ***Due Sun Nov 8, 11:59 PM***
12	**Nov 9 — Live extension session: perceptual maps with AI synthetic respondents**, hands-on, applied to Amazon’s tablet positioning; apply the method to your own case	***Nov 11 — Veterans Day, no class.***

Wk	Monday	Wednesday
13	**Nov 16 — Chunlei live debrief** · then **TEAM 4 PRESENTS: Chunlei** (case walkthrough) + survey. *The AI in Business Foundation lecture is posted as a recording this week (Quiz 13 on Nov 25).*	**Nov 18 — Quizzes 11 + 12:** Chunlei debrief (Nov 16; two days later, Cycle 5 exception) + perceptual-map extension (Nov 9). **Guest lecture follows the quizzes** + extension preparation time.
14	**Nov 23 — EXTENSION PRESENTATIONS (in person):** all four teams (12 min + 3 min Q&A each) + class evaluation survey	**Nov 25 — Asynchronous: Quiz 13 online, 4:05–4:15 PM**, on the AI Foundation lecture recording. Then self-paced **final exam review**. No campus meeting.
15	**Nov 30 — FINAL EXAM — in person, in class**	**Dec 2 — Teaching Note instruction session:** report structure walked with a worked example · outline peer swap · course wrap + end-of-term evaluation
Finals	**Dec 7–13 — Teaching Note Report due** at the registrar-scheduled final-exam slot (announced on Canvas)	

Weekly quiz rhythm: **Wednesday, on the previous week's taught material.** Case-workday and holiday deferrals carry forward to the next Wednesday; the table below is the complete scope. Q1 (Marketing Strategy Overview) and Q2 (All Customers Differ) stay as completed on Aug 31. Thirteen quizzes, 5 points each; **best 10 of 13 count = 50 points**, no makeups. Single quiz: **4:05–4:15 PM**. Double quiz: first **4:05–4:15**, second **4:15–4:25 PM**; team teaching or the guest follows. All quizzes are in person except **Q13 on Nov 25**, taken online at 4:05–4:15 PM during the scheduled asynchronous day. The syllabus quiz is unscored practice. Recordings are review/preparation resources; a recording does not automatically create a separate quiz. P2/CLV is not a separate quiz topic, and the Nov 2 P4 lecture is exam material, not quizzed.

Quiz calendar

Quiz	Date (2026)	Content / teaching date	Scheduling note
Q1	Mon Aug 31	Marketing Strategy Overview	Completed before the format change
Q2	Mon Aug 31	P1 / All Customers Differ	Completed before the format change
Q3	Wed Sep 23	Amazon debrief — Sep 9	Sep 16 case workday
Q4	Wed Sep 23	P3 / All Competitors React — Sep 14	Previous week
Q5	Wed Oct 7	Aldi debrief — Sep 21	Sep 30 case workday
Q6	Wed Oct 7	Branding — Sep 28	Previous week
Q7	Wed Oct 21	Under Armour debrief — Oct 5	Oct 14 case workday
Q8	Wed Oct 21	Offering Diffusion — Oct 12	Previous week
Q9	Wed Nov 4	Google Glass debrief — Oct 19	Oct 28 case workday
Q10	Wed Nov 4	Innovation, market research & offering development — Oct 26	Oct 28 case workday
Q11	Wed Nov 18	Chunlei debrief — Nov 16	Cycle 5 exception: debrief moved with the Nov 8 due date
Q12	Wed Nov 18	AI synthetic-respondent perceptual maps — Nov 9	Previous week
Q13	Wed Nov 25 (online)	AI in Business Foundation — recording posted the week of Nov 16	Asynchronous review day

Method of Instruction

The primary methods of instruction will be case analysis, group work, class discussion, in-class workdays, and student teaching (presentation + teaching note). Lectures are delivered live on Mondays, alongside case debriefs and applications; Wednesdays host quizzes and team teaching or protected Zoom case workdays. Recordings support review and case preparation. Class discussions and participation make up a majority of classroom work.

AI Policy

You are required to use generative AI to work through every case. Each Business Case Discussion submission uses the structured workflow built into its assignment document (the fillable Word template on Canvas):

- **Human first.** For each question, you write your first take (Box A, on the Amazon case) *before* any AI touches it, then build your final answer with your AI tutor, then document what changed.
- **Voice-mode tutoring is the recommended workflow** — attach the case PDF, paste the starter prompt from the assignment doc, and *talk* through the questions. Prefer typing? The same prompt and rules work in a text chat.
- **What's graded is substance, not prompt count:** at least **3 substantive exchanges per question** — your positions, follow-ups, and pushbacks. Stating the assignment question to set the agenda is fine; it just doesn't count as an exchange.
- **Name what you rejected.** At least one AI suggestion you overrode, with the reason. Negative cases are where your judgment shows: "AI claimed X; I checked the case and went with Y" beats ten clean prompts.
- **A working transcript link** (share link, not a pasted dump) is required with every submission. Voice transcripts read like conversation — that's a feature: they are your integrity record. Fishing for answers after the tutor refuses is visible in the transcript and graded down.
- **Generative AI is NOT permitted during quizzes or the Final Exam.** It is required for case work and team-teaching preparation only.

Each case's **Skill Guide** (released with the assignment) shows what strong exchanges and strong answers look like; **Model Answers** (including a model first take and delta log) are released after grading.

Attendance, Participation, and Professionalism

Zoom-chat check-in

Zoom chat is the attendance method for every class, effective September 14. Sign in to the class Zoom link on Canvas with your **CPP Zoom account** and type **“check in”** in chat when the instructor prompts you. Use your roster name so the chat record can be matched to you. Joining the meeting alone does not count as a check-in. No iClicker check-in or subscription is required for this course.

- **In-person meetings:** attend in Bldg 9, Rm 211 and join Zoom from your seat, microphone muted and speaker audio off to avoid feedback. The Zoom check-in does not replace physical attendance on an in-person day.
- **Zoom case workdays (Sep 16, Sep 30, Oct 14, Oct 28):** join remotely at 4:00 PM, check in when prompted, and participate in the case work and breakout discussions until 5:15 PM. Have the case, your assignment document, and headphones ready.
- The session chat record is used to record attendance. Respond to in-class prompts as directed. If you cannot access Zoom or your check-in fails, tell the instructor during that class.

First Lecture Attendance Policy: Per Cal Poly Pomona's policy, students who miss the first lecture will be dropped to make room for waitlisted students. Additionally, failing to complete the contact sheet by the end of the first class will result in being dropped from the course.

Regular attendance and active participation are essential — a live, case-based course depends on participation in the scheduled classroom or Zoom session, and on presentation Wednesdays you are the presenting team's survey graders. You are allowed **two absences** without penalty. Each additional unexcused absence reduces your attendance score by 25% of its value. Illness-related absences are excused with notification or a doctor's note. Tardiness equals absence; class times are determined by the classroom clock.

Students must maintain professional behavior during class, including arriving on time, showing courtesy to classmates and instructor, being reliable in team preparation, and meeting standard student and employee conduct expectations. **Your team's presentation days (the Wednesday of your case week — Mon Nov 16 for Team 4 — and Mon Nov 23 for the extension round) are professional commitments:** missing your own team's presentation without an excused absence scores zero on that component's individual share.

Examinations

There will be one final exam (mixture of multiple choice, true-false, and short answers), given **in person, in class, on Monday, November 30**. It assesses familiarity and understanding of marketing strategy concepts and practices. You are responsible for all recorded lectures, all live lectures (including the P4 lecture, the extension session, and the guest lecture), the recorded AI Foundation lecture, everything covered in class (including team presentations), and the assigned text and cases. A self-paced review is posted over Thanksgiving week (Nov 25). During finals week there is no sit-down exam; your team's **Teaching Note Report** is due at the registrar-scheduled final-exam slot.

Quiz & Exam Rules

Weekly quizzes follow the **Wednesday quiz calendar** above and cover the previous week's taught material, with case-workday and holiday deferrals. Bring a charged device. Q1 and Q2 remain as completed before this change; Q13 on Nov 25 is online during the asynchronous review day. Missed quizzes cannot be made up — the three dropped scores cover missed quizzes. The Final Exam (Mon Nov 30) is in person, in class, on Canvas. During every quiz and the Final Exam:

1. **Stay in the Canvas quiz tab.** Canvas logs every time the quiz page loses focus — every tab switch and window change, with timestamps.
2. **Work alone, with no outside resources** unless I explicitly identify the quiz/exam as open-resource. **No generative AI.**
3. **No phones-as-second-screens, no earbuds/headphones** during the quiz or exam window, unless an approved DRC accommodation specifies otherwise.

Consequences of a flagged submission: zero on that quiz/exam, and an Academic Integrity report filed per CSU Standards for Student Conduct. **If technology fails mid-quiz:** show me immediately in the room; for the Nov 25 online quiz, email a screenshot during the quiz window. Do not silently resubmit.

Case Preparation and Late Submissions

All cases assigned are based on actual marketing management issues. The case study approach allows students the opportunity to assume the role of a marketing manager faced with the challenges and opportunities in a competitive marketplace.

Late Submissions: Time management is a key skillset you'll need throughout your career. Late submission will not be accepted and results in a grade of zero. Case submissions are due **Sunday 11:59 PM** and gate the debrief week — the live debrief follows on Monday, and its quiz is scheduled for a later Wednesday. No submission, no Business Case Discussion credit. If you inform me ahead of the due date with legitimate reasons, I might judge and accommodate a few days of extension.

OTHER CPP POLICIES, STUDENT SUPPORT & RESOURCES

Communication:

Your CPP email account is the official means of communicating with the university. Any email from you to the instructor should be sent through your official CPP email account. Please be advised that due to privacy and security concerns, I am unable to respond to emails from or about students that do not originate from an

official university email address.

Excused Absences:

Excused absences include the following situations listed below. Authorized absences do not relieve the student of class responsibilities. Written documentation of the authorized absence (including the date/time) must be provided to the instructor for the opportunity to make up missed assignments.

Student participation in authorized activities as an official representative of the university (i.e. athletic events, delegate to regional or national meetings or conferences, participation in university-sponsored performances).

Participation in other activities deemed by the Dean of Students to warrant an excused absence, such as required military training.

An extreme personal emergency or serious medical condition.

The death of an immediate family member (such as parent, sibling, spouse or child).

Student participation in religious holidays.

Accommodation Requests:

I encourage students with disabilities to visit me privately during office hours during the first week of the semester to discuss appropriate accommodation needs during lectures and exams. You should also contact the Disability Resource Center (Bldg 9, Rm 103) to register as a student with a documented disability, and to coordinate your testing accommodation needs with me.

Academic Integrity Notice:

Academic integrity is essential to the educational process. The value of an academic degree is based upon the reputation of the university. Academic dishonesty, which includes plagiarism or cheating, is a serious offense. Students are responsible for understanding and complying with California State University Standards for Student Conduct that are available on the website of the Office of Student Rights & Responsibilities.

Dishonesty results in an immediate zero on that assignment with no chance for make-up. All forms of academic dishonesty will be registered with Judicial Affairs.

Bronco Dreamers Resource Center:

Supports the holistic success (academic, personal, professional) of undocumented students at Cal Poly Pomona. Our purpose is to educate the community about current issues and to convene campus allies in a dialogue of student success.

Counseling & Psychological Services (CAPS):

Provides quality mental health services to support your overall health and wellbeing. CAPS provides many services such as workshops, group or individual therapy, wellbeing coaching, crisis intervention, and support to access on- and off-campus resources.

Disability Resource Center (DRC):

Provides students with Test Accommodations, Notetaking Services, Alternate Media, Modified Attendance, Deaf and Hard of Hearing Services, Mobility Assistance, Housing Accommodations, Student Success Coaching, and Peer Mentoring.

EWS Subject Librarian:

EWS Research Guide: http://libguides.library.cpp.edu/ews Sally Romero, sallyromero@cpp.edu

Inclusive Excellence:

The role of Inclusive Excellence is to work with the campus community to ensure that Cal Poly Pomona's core institutional values of diversity and inclusivity are deeply embedded in every aspect of our community.

Institutional Equity and Compliance:

Oversees the University's compliance with Federal and State laws and regulations and CSU System policies. Part of this compliance includes overseeing reports and investigations of prohibited conduct, including: discrimination, protected status, retaliation, Whistleblower Protection Act, dating and domestic violence, and stalking; sexual misconduct, consensual relationship, and religious accommodation. Office of Institutional Equity & Compliance (OIEC).

University Ombuds:

Contact the Ombuds Office for concerns about, not limited to interpersonal conflicts, disagreement over grades, working conditions, clarification of policies or procedure, or co-worker difficulties.

Learning Resource Center (LRC):

The LRC is the University's most comprehensive tutoring service, promoting the development of students' critical thinking, problem solving, and analytical skills through Academic Skills Coaching, Subject Tutoring, Supplemental Instruction, and the Writing Center.

Office of Student Life & Cultural Centers:

Includes Clubs and Organizations, Fraternity and Sorority Life, Leadership Development, African American Student Center, Asian and Pacific Islander Student Center, Cesar E. Chavez for Higher Education, Native American Student Center, Pride Center, and Womxn's Resource Center.

Student Health & Wellness Services:

Health Educators and Peer Health Educators provide Cal Poly Pomona students with health education to prevent the development of chronic conditions. Wellness Services provides resources and programs dedicated to various health topics including but not limited to nutrition, sexual health, mental health, physical activity, sleep, and stress management.

Student Support & Equity Programs:

Student Support and Equity Programs (SSEP) aspires to offer model programs and services that continuously evolve to meet the changing needs of our diverse students.
